The world of Architectural Lights

Neptune Lights ... A tale of stylish LED Lights

Can you imagine a home with no lights? It doesn't even sound like home. Light acts as a medium for people to show things that they want to show in the way they wish to show. While bright lights add a different mood to the setting, dim lights tend to tell a separate tale. One can set the mood of their surroundings by only changing the lighting. That's the impact lights have. They can speak for the place!

One can say that light becomes an indispensable part of people's lives. And to be there for people to help them tell their stories is what we aim to do at Neptune Lights.

Our Story

Founded sometime in the 1980s, Neptune Lights was built with the vision to not just provide lighting solutions but to become a medium for people to express themselves. In 2011, we brought around revolutionary lighting solutions by incorporating LED lights. With the advent of LED, we soon became experts who specialize exclusively in LED technology.

LED is our passion... and we serve with conviction!

Apart from leveraging technology, we also combine our experience, precision, and quality control to provide our customers with innovative and high-quality products at competitive rates. Every product we manufacture is in accordance with the latest norms and standards, thus proving to be safe, reliable as well as economical.

Adding to our list of products, we provide a wide range of architectural lighting, interior lighting and exterior lighting for commercial and industrial buildings, retail, hotels, restaurants, etc.

So, if you are looking to enhance your space and wish to tell your story, then you can always get in touch with us. Explore the classiest and most sophisticated range of LED lighting solutions at Neptune Lights.

Thank You!

THE HISTORY OF LIGHTING

1802

Humphry Davy

invented the Electrical Arc Lamp.

1840

Warren de la Rue

Built a light bulb using a platinum filament that was coiled inside a vacuum tube.

1878

Thomas Edison

Filed a patent under the label "Improvement in Electric Lights."

1880

Edison

Began marketing and manufacturing the latest version of his bulb to commercial clients & built the first central power plant in the U.S.

1893

Nikola Tesla

Demonstrated the possibility of wireless electricity, which he used to light a Geissler tube.

1874

Henry Woodward & Mathew Evans

Filed a patent for their carbon rod lamps, but failed at creating a commercial version.

1879

Edison

Submitted another patent.

1893

General Electric

Produced the first enclosed carbon arc lamp for commercial clients.

1901

Peter Cooper Hewitt

Introduced the Mercury-Vapor Lamp (gas discharge lamp).
